

Presenter Cue: turn an AI answer into slides

A free presentation studio in your browser. Describe your talk, let ChatGPT, Claude or Gemini write it, and paste the answer: Presenter Cue lays it out as clean slides you can edit and present, with your phone as the remote.

Open it: presentercue.com/studio · Plans: presentercue.com/pricing · Updated October 2026

What Presenter Cue is

Presenter Cue does not run its own AI model. It writes a detailed prompt for the assistant you already use, reads the answer (JSON, a code block or a plain outline) and draws it as slides with a renderer built for presentations. Text is fitted to every layout, so long titles shrink instead of spilling off the slide.

- **Free:** Prompt builder for ChatGPT, Claude and Gemini, Paste any AI answer: JSON, a code block or an outline, All 15 layouts and 8 themes, Slide editor with pictures, charts and undo, Present full screen with keyboard and clickers, SVG download, JSON backup and speaker notes, No sign-up, no watermark, no slide limit.
- **Presenter Cue Pro** adds your phone as the slide remote (next, back, jump, timer, laser pointer, blackout and notes; also with no internet), presenter view with notes, next slide and timer, and PDF and PNG downloads: Presenter Pass \$10 for 7 days, or Presenter Pro \$99 per year. Plans never renew automatically. There is no free trial.
- **Private:** decks are saved in your browser. Nothing is uploaded to Presenter Cue, and there are no analytics or ads.
- **No AI credits:** the free versions of ChatGPT, Claude and Gemini work.

Make a deck in four steps

- 1 Open presentercue.com/studio and choose New. Describe the topic, audience, number of slides and tone.
- 2 Tap ChatGPT, Claude or Gemini. ChatGPT and Claude open with the prompt filled in; for Gemini it is copied, so paste it.
- 3 Copy the assistant's whole answer and paste it into the studio. The slides appear at once, with speaker notes.
- 4 Edit any text, add your pictures, pick a theme, then press Present (F5). Esc ends the show.

The 15 layouts

LAYOUT	USE IT FOR
Title	the opening slide: deck title and a one-line subtitle
Section	a divider that starts a new part of the talk
Agenda	a numbered list of what the talk covers (3 to 8 items)
Bullets	a heading with 3 to 5 short points
Two columns	two groups side by side, each with a heading and points
Image left	a picture on the left, heading and points on the right
Image right	heading and points on the left, a picture on the right
Full image	one full-bleed picture with a caption over it
Quote	one short quotation and who said it
Big numbers	2 to 4 key numbers, each with a short label
Chart	a bar, line or pie chart, with up to 3 takeaways beside it
Timeline	3 to 6 dated milestones in order
Process	3 to 6 numbered steps, each with a short explanation
Comparison	two options compared: before and after, pros and cons, us and them
Closing	the last slide: thanks, a call to action, contact details

Free and Pro

	FREE	PRO
Prompt builder and AI-answer import	Yes	Yes
15 layouts, 8 themes, editor, pictures and charts	Yes	Yes
Present full screen, keyboard and clickers	Yes	Yes

AI makers

Free AI presentation makers: turn ChatGPT, Claude or Gemini answers into clean, editable slides, pitch decks and lessons in your browser. [All ai makers](#).

Free AI presentation maker

A free AI presentation maker that works with ChatGPT, Claude or Gemini. Describe your talk, paste the answer, get clean slides with speaker notes. No account.

Turn ChatGPT answers into slides

Turn ChatGPT into slides: Presenter Cue writes the prompt, opens ChatGPT, and turns the answer into a designed presentation with speaker notes. Free.

Make slides with Claude

Make slides with Claude: Presenter Cue opens Claude with a prompt built for presentations and turns the answer into editable, presentable slides.

Turn Gemini answers into slides

Use Google Gemini to write your presentation, then paste the answer into Presenter Cue for designed, editable slides with notes. Free, in your browser.

AI pitch deck generator

Generate a startup pitch deck with ChatGPT, Claude or Gemini: problem, solution, market, traction, model, team and the ask, as editable slides.

AI lesson presentation maker

Make lesson slides with AI: objectives, key ideas, worked examples, a quick check and a recap, written by ChatGPT, Claude or Gemini and ready to teach from.

Prompts

Copy-ready prompts for presentations, pitch decks, lessons and speaker notes. Each asks for an answer Presenter Cue turns straight into slides. [All prompts](#).

ChatGPT prompt for presentations

A copy-ready ChatGPT prompt for presentations that returns structured slides with layouts, charts and speaker notes. Works in Claude and Gemini too.

Pitch deck prompt

A copy-ready AI prompt for a startup pitch deck: problem, solution, market, traction, business model, team and the ask, with speaker notes.

Lesson slides prompt for teachers

A copy-ready AI prompt for lesson slides: objectives, key ideas, examples, a quick check and a recap, with teacher notes for every slide.

Speaker notes prompt

Prompts that write natural speaker notes for every slide, and how to read them on your phone or in presenter view while you present.

Templates

Free presentation templates you can open, edit and present in your browser: startup pitch deck, lesson, project update, product launch, workshop and school project. [All templates](#).

Startup pitch deck template

Free startup pitch deck template. The slides investors expect: problem, solution, market, traction, model, team and the ask. Open it in your browser, edit it, or have your AI write your version.

Lesson presentation template

Free lesson presentation template. A classroom lesson: objectives, key ideas, a worked example, a quick check and a recap. Open it in your browser, edit it, or have your AI write your version.

Project status update template

Free project status update template. A weekly or monthly update: status at a glance, progress, risks, decisions needed and next steps. Open it in your browser, edit it, or have your AI write your version.

Product launch template

Free product launch template. Introduce a new product: the why, what it does, who it is for, pricing and the launch plan. Open it in your browser, edit it, or have your AI write your version.

Training workshop template

Free training workshop template. Run a workshop or onboarding session: goals, how it works, a practice exercise and takeaways. Open it in your browser, edit it, or have your AI write your version.

School project template

Free school project template. A student presentation: the question, research, findings with a chart, and what you learned. Open it in your browser, edit it, or have your AI write your version.

Uses

How teachers, students, founders, sales teams, trainers and speakers use Presenter Cue to make slides with AI and present them from a phone. [All uses](#).

Presentations for teachers

Make lesson slides with ChatGPT, Claude or Gemini, teach from any classroom computer, and change slides from your phone with your notes in hand.

Presentations for students

Make a school project presentation for free: plan it with an AI assistant, write it in your own words, and present it with confidence. No account.

Business presentations

Make business presentations with your AI assistant: status updates, quarterly reviews and plans, with charts, big numbers and speaker notes.

Sales presentations

Build a sales presentation with ChatGPT or Claude: the customer's problem, your solution, proof, pricing and next steps, ready to present.

Conference talks

Prepare a conference talk: AI-drafted slides, speaker notes, a talk timer, presenter view, and your phone as the clicker. In your browser.

Training and workshop presentations

Make training, onboarding and workshop slides with AI: goals, a model, practice exercises and takeaways, with trainer notes on every slide.

Presenting

Present from your browser: use your phone as the slide remote, see notes in presenter view, show slides on a projector or TV, and keep time. [All presenting](#).

Your phone as the presentation remote

Turn your phone into a slide remote: next, back, jump to any slide, laser pointer, blackout, timer and your speaker notes. No app; works offline too.

Presenter view with notes

Presenter view in your browser: the audience sees the slides while you see your notes, the next slide, a clock and a talk timer.

Present on a projector, TV or second screen

How to show your slides on a projector, TV or second monitor from the browser: extended displays, the audience window, full screen and screen sharing.

Clickers and keyboard shortcuts

Use any presentation clicker with Presenter Cue, plus every keyboard shortcut: next, back, jump to slide, black and white screen, timer and full screen.

Presentation timer

A presentation timer in presenter view and on your phone remote: starts with your talk, pauses and resets with one key, next to the clock.

How-to

Step-by-step guides: make a presentation with ChatGPT, turn notes into slides, and export slides to PDF. [All how-to](#).

How to make a presentation with ChatGPT

How to make a presentation with ChatGPT: write a good prompt, get structured slides, turn them into a designed deck, then edit and present it.

Turn notes into slides

Turn your notes, an outline or a document into a presentation: paste it into your AI assistant with the right prompt, then into Presenter Cue.

Export slides to PDF, PNG or SVG

Download your presentation as a PDF, PNG pictures or SVG, or keep a backup file. Which format to use for email, print, social posts and design tools.

Compare

Fair comparisons of Presenter Cue with AI slide tools such as Gamma and Beautiful.ai, and with PowerPoint and Google Slides. [All compare](#).

A Gamma alternative that uses your own AI

Looking for a Gamma alternative? Presenter Cue turns answers from your own ChatGPT, Claude or Gemini into slides, with a phone remote. How they differ.

A Beautiful.ai alternative

Comparing Presenter Cue and Beautiful.ai: smart layouts in both, but Presenter Cue uses your own AI assistant, needs no account and adds a phone remote.

Presenter Cue, PowerPoint and Google Slides

When to use Presenter Cue instead of PowerPoint or Google Slides: fast AI drafts and a phone remote, versus full design control and collaboration.
